

JOSH DUNLAP

✉ josh.dunlap@stthomas.edu  linkedin.com/in/joshdunlap2

SKILLS

Languages: TypeScript, JavaScript, Swift, Objective-C, Python, Java, SQL

Frameworks & Tools: React, Node.js, Cloudflare Workers, SwiftUI, CoreBluetooth, AppKit

Platforms & Services: NetSuite (SuiteScript), WooCommerce, Supabase, Git/GitHub, Xcode

Other: Power BI, Tableau, Microsoft Office

EDUCATION

University of St. Thomas

Bachelor of Science in Computer Science

Expected Graduation: May 2026

3.51 GPA

Relevant Coursework: Data Structures, Algorithms, Computer Architecture, Information Security, HCI, Web Development, Database Design, Applied Regression Analysis, Business Intelligence

WORK EXPERIENCE

Great Lakes Radiant & Industrials

Operations & Technology Lead

Minneapolis, MN

May 2025 – Present

- Architected and deployed a **Cloudflare Workers** middleware integration connecting **NetSuite**, **WooCommerce**, and **ShipStation**, automating order flow and reducing manual data entry across five office locations.
- Built internal tooling in **React/TypeScript** including a web-based heating system layout tool adopted by the sales team and praised by a partner manufacturer as a competitive differentiator.
- Drove company-wide technology modernization across ERP scripting (**SuiteScript**), transactional email infrastructure, password management, and cloud productivity migration.

Punch Through

Mobile Software Engineer Intern

Minneapolis, MN

February 2025 – August 2025

- Designed and implemented an OTA firmware update workflow for client **BLE** devices using **Swift**, enabling reliable over-the-air distribution with robust error handling and recovery mechanisms.
- Built and shipped user-facing features in **LightBlue** with **SwiftUI** and **CoreBluetooth**, including a favorites system for peripherals, tooltips, and log filtering, improving usability and device discoverability.
- Resolved critical stability issues across **CoreBluetooth** scanning, notifications, and connection handling, significantly improving reliability for over **120,000+** monthly active users.

YWCA

IT Support Specialist (Work Study)

Saint Paul, MN

September 2024 – February 2025

- Delivered end-user support across hardware, software, and networking, resolving issues for **100+** staff and ensuring minimal downtime.
- Led modernization of the **case management system**, managing **data migration** and improving reporting accuracy, accessibility, and security across housing programs.

TechSmith

Software Engineer Intern

East Lansing, MI

May 2024 – August 2024

- Developed macOS features for **Snagit** in **Swift** and **Objective-C**, collaborating in Agile sprints to deliver intuitive **SwiftUI/AppKit** interfaces.
- Led development of the background noise removal UI and analytics, delivered ahead of schedule; 95% of survey respondents expressed enthusiasm for the new feature.
- Developed **unit tests** to ensure software stability; identified and resolved performance and reliability issues through pair programming and code review.

TechSmith

Software Testing Intern

East Lansing, MI

May 2023 – August 2023

- Designed and executed QA test plans, managing defect tracking and verification across multiple product teams.
- Evaluated IPv6 compatibility within TechSmith products, safeguarding **\$3M** in annual federal sales.

LEADERSHIP & SERVICE

Big Brothers Big Sisters

Volunteer Youth Mentor

April 2025 – Present

- Mentor an elementary-age child through regular one-on-one sessions, providing guidance, support, and role modeling.

FIRST Robotics

Technical Mentor

September 2019 – Present

- Guide students on software-hardware integration, teaching **Java** programming and embedded systems concepts.
- Support and help organize robotics competitions, ensuring smooth operations and a positive experience for participants.
